

Nanocerox joins NAM – National Association of Manufacturers Board of Directors

NANOCEROX CONTINUES SUPPORT TO DOMESTIC HI-TECH MATERIALS MANUFACTURING EFFORTS

ANN ARBOR, MI – APRIL, 2012

Michael Kelly, CEO of Nanocerox in Ann Arbor, MI was recently elected to the National Association of Manufacturers (NAM) Board of Directors during their spring meeting. Mr. Kelly has served on the NAM board for the last three years while serving as CEO / President at Allied Photochemical, Inc.

“Nanocerox considers the National Association of Manufacturers (NAM) as a key part of our continuing strategy to work closely on common and consistent policies that support US Manufacturing companies,” says Michael Kelly – CEO. “In addition to supporting a common message, Nanocerox has the opportunity to partner with key US Companies on new and innovative technologies and their applications.”

About NAM – National Association of Manufacturers:

The National Association of Manufacturers (NAM) is the preeminent US manufacturers association as well as the nation’s largest industrial trade association, representing small and large manufacturers in every industrial sector and in all 50 states. Manufacturing employs nearly 12 million workers, contributes more than \$1.6 trillion to the U.S. economy annually, is the largest driver of economic growth in the nation and accounts for the lion’s share of private sector research and development.

The NAM understands that its role as the most influential U.S. manufacturers association is to be the powerful voice of the manufacturing community and the leading advocate for a policy agenda that helps manufacturers create jobs. The NAM – a manufacturer’s association consisting of 11,000 manufacturing companies – is a strong force for sensible government policies that will reduce the cost of production and tear down barriers to exports.

The NAM’s world-class staff of policy experts provides unmatched access and information on the key issues affecting your business and your bottom-line. We are on the front lines of a wide range of policy battles, from health care reform and labor relations to energy and the environment to trade policy and taxes. At every turn, we are working on behalf of manufacturers in America to advance policies that help manufacturers do what they do best: create economic strength and jobs.

NAM Board of Directors:

The committed and accomplished executives on the NAM Board of Directors are the driving force behind the success of the NAM’s efforts to create a favorable policy climate for manufacturers. The NAM Board is comprised of more than 200 of the nation’s top manufacturing executives, representing large and small companies alike across all industrial sectors. Members of the Board provide national and global perspectives on the impact of federal government action upon their companies’ ability to grow and prosper. In addition, NAM Directors contribute their leadership and expertise to the NAM’s policy development process.
